Alcoa Streets to be Repaved

The City of Alcoa announced today that it will begin the milling and resurfacing of a portion of its streets.

Work will start on Tuesday morning, June 12, 2007 and continue throughout the week on Calderwood Street between Joule and Bessemer Streets, West Lincoln Road between Hall and Rankin Roads, and West Howe Street between Hall Road and Kelvin Street. Milling work will be done by Tennessee Asphalt while APAC Harrison will complete the paving.

Motorists traveling through the areas may want to choose an alternate route around the work or allow a few extra minutes to reach their destination. Motorists are reminded to exercise caution in these areas.
